

Do you love bald eagles?

Do you have creative ideas for how to use the Duke Farms Eagle Cam to bring your lessons to life for your students?

Do you want to get up close and personal with a bald eagle chick?

Duke Farms and the Conserve Wildlife Foundation of NJ are offering a once in a lifetime opportunity to classroom teachers. One lucky teacher will be selected to join Duke Farms staff and NJ eagle biologists for the spring bald eagle chick banding in May. Our winner will join scientists in the field as they take measurements on chicks to help diagnose the health of NJ's eagle population!

Here's what you need to do:

- Write an awesome lesson plan for using the Duke Farms Eagle Cam in your classroom. Plans should follow the same format as the [eagle lesson plans on the CWF site](#). Plans will be judged based on creativity, use of state standards (especially NGSS), applicability in any school setting, completeness and accuracy. All grade levels are encouraged to apply.
- Submit your lesson plan by midnight on April 1st (no kidding!). One talented winner will be notified by April 15th.

Questions and submissions should be directed to Samantha Wolfe, Programs Assistant at swolfe@dukefarms.org

Lesson plan submissions will become property of Duke Farms and the Conserve Wildlife Foundation of NJ and may be posted online. Teachers will be credited appropriately for their work.
